

1 Tobit vs Heckman vs Truncated

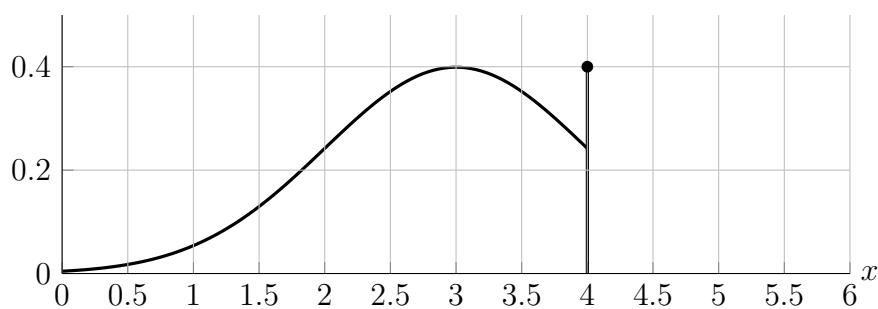

Simple regression

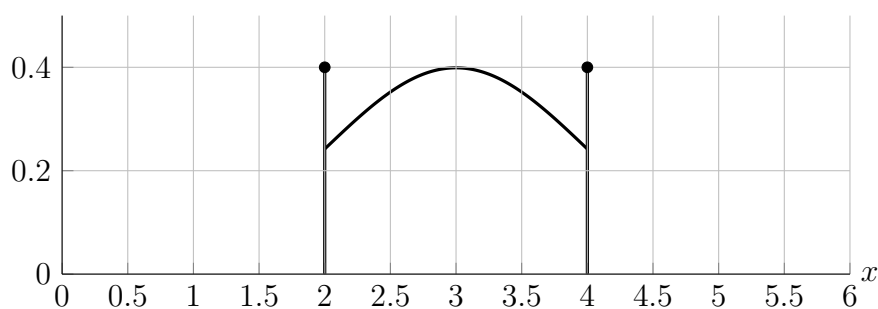

Truncated regression

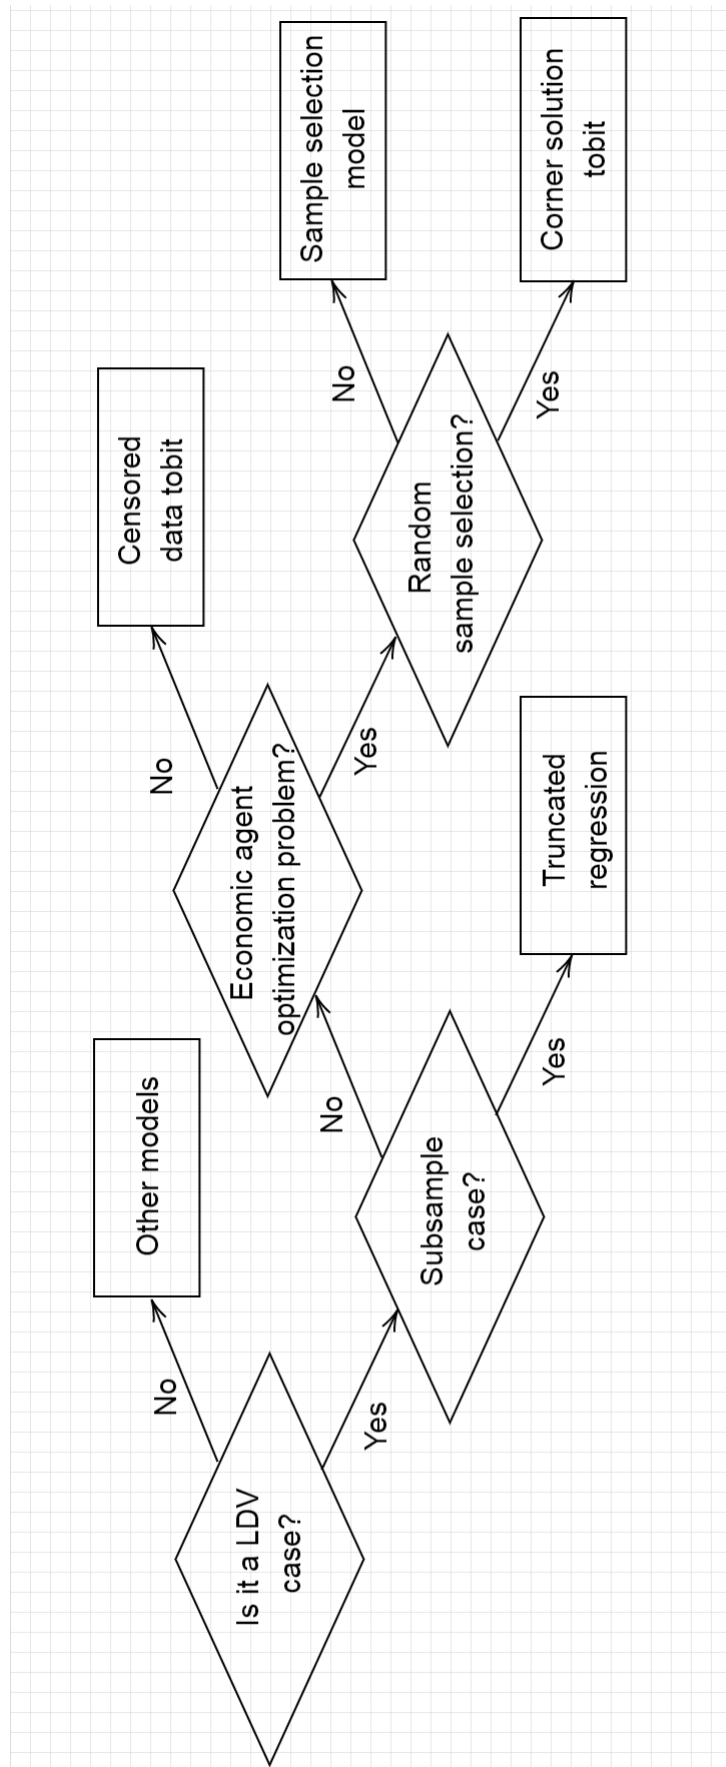

Censored data from above

Censored data from below and above

Choose one model out of: tobit, heckman, truncated regression

1. Shoes expenditures
2. Contribution to charity
3. Volvo Cars, as a worldwide leader in safety, is sending a strong signal about the dangers of speeding and will limit the top speed on all its cars to 180 kph from 2020.¹
4. Speed determinants. Motorway lower speed limit in Poland is 60 kilometres-per-hour, while the upper is 140 kilometres-per-hour. We assume that all drivers follow the rule.
5. Speed determinants. Motorway lower speed limit in Poland is 60 kilometres-per-hour, while the upper is 140 kilometres-per-hour. We assume that all drivers follow the lower limit, but the upper is often violated.
6. Number of running shoes that runners have.
7. Wages of married women
8. Monthly income. Data from a survey in which we ask:
"Do you earn more than USD 5K? If not, submit the exact value."
9. American Billionaires wealth determinants
10. Durable goods expenditures
11. Expected age of retirement
12. Dudley and Montmarquette (1976) analyzed whether or not the United States gives foreign aid to a particular country and, if it does, how much foreign aid it gives.²
13. Duration of physical activity at a gym
